**Donation of first aid kits - 07.02.2005**

The Seychelles Government, through the Local Government Department, has received a donation of 100 packs of first aid kits from the Ozone Barter Limited in New Zealand. Ozone is a corporate barter exchange operating in Australia, New Zealand and the United States.

Its managing director Daniel Evans, when heard of the tsunami which struck several south-east Asian and Indian Ocean countries including Seychelles, took a personal interest in our country, which he visited when he was at a very young age and of which he holds many good memories.

According to a spokesperson for the Local Government Department this donation from Ozone is the first among others that will be forthcoming.

The first aid kits will be distributed to all districts for use by the district emergency brigades.
